DIGITAL Distance Measuring Wheel

Electronic counters add a new level of performance and versatility to Meter-Man Measuring Wheels. Easy-to-read LCD display shows distances in feet or meters simply by pushing a button! Dual counters measure total distance or segments. A great new way to measure from Meter-Man with quality you can count on.

LCD DISPLAY

LCD (Liquid Crystal Display) shows six digits—four whole numbers and two decimals. All functions and displays are clearly identified and easy to read.

OPERATES IN FORWARD AND REVERSE

The two counters operate in either direction, adding or subtracting accumulated distance.

LONG-LIFE BATTERIES

(4) AA batteries are well protected and easy to replace. Projected battery life is one year.

MODEL DW 31

10-inch diameter
(25.4 cm diameter)

MODEL DW 45

14.5-inch diameter
(36.3 cm diameter)

Other Models Available

Sure-grip rubber push buttons are easy to read and use.

ON/CLR

This function key turns the electronics on when pressed once and clears the existing reading when pressed a second time. If the wheel or the controls are not operated for a period of approximately three minutes, the unit will automatically turn off to conserve battery life, but will continue to retain the data.

#1/#2

This button alternates the display between the #1 or #2 data. The display includes a #1 or #2 to indicate which is in use.

HLD/CLR

This key holds a reading on either the #1 or the #2 counter. Pressing the button once sets the counter (#1 or #2 whichever is displayed) into a HOLD state while allowing the other counter to continue to count. Pressing this button a second time releases the HOLD and clears the counter.

M/FT

Select from 3 measuring modes:

- Feet + inches (0000'00")
- Feet + hundredths of a foot (0000.00)
- Meters + centimeters (0000.00)
